

# Fully integrated Procurement management system built on Power Platform

## Overview

# Procurement management system

A Microsoft Power Platform based procurement management solution to automate all procurement processes with an aim to eliminate all manual processes and expedite business operations.

### Client

Oman Air, a leading airline with more than 50 years of rich legacy in the travel and tourism sector. Founded in 1993 to serve domestic routes, today Oman Air is a major international carrier connecting cities across the world. With a fleet of most modern, state-of-the-art aircraft, Oman Air have consistently explored and leveraged cutting-edge technological solutions to drive innovation and serve their global client base with the best experiences.

## Requirement

The project aimed at digitizing the entire procurement process, including purchase, requisition, approval, and other processes, and thereby eliminate slow manual processes, and expedite business operations.

## Challenges

The client required a simple, easy-to-integrate solution to automate their procurement process. Paper-based manual processes had multiple challenges

- Lack of centralised system to track procurement process, leading to inefficient vendor management.
- Manual approval processes were tediously slow and inefficient.
- Compliance risks due to lack of tracking mechanisms for procurement policies.
- Poor visibility into procurement data, impeding reporting and decision-making.
- Late procurement of required processes delayed business operations resulted in poor productivity.
- Difficulty in integrating procurement processes with existing ERP and finance systems.

# Solution

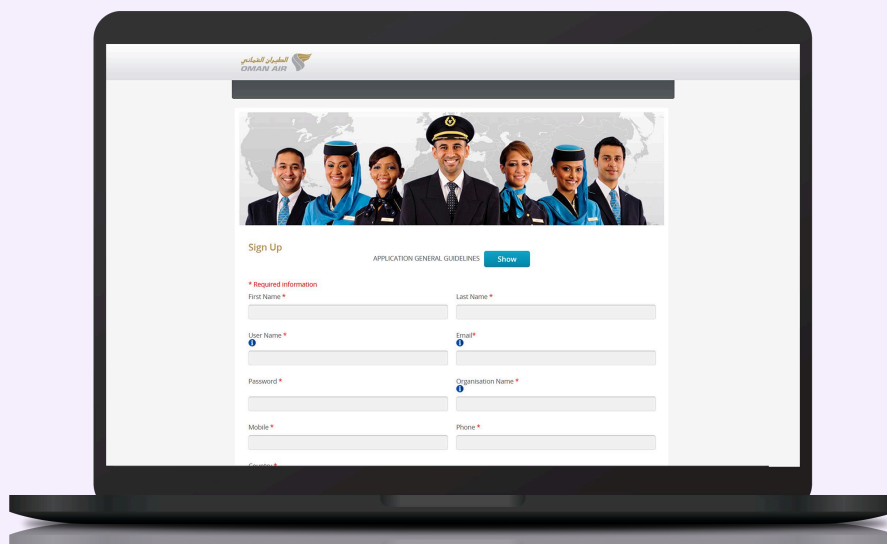

A Microsoft Power Platform based solution leveraging the best capabilities of four powerful tools. The solution ensure:

- **Centralized Repository**  
A Power platform-based solution ensured a centralized system to track the entire procurement process, eliminating manual, paper-based purchase processes. The system ensured automated recording of past purchases and tracking approval status easier.
- **Automated alerts and reminders**  
Purchase processes cannot afford delays. To ensure expedited processes, we integrated automated email alerts. This meant authorized persons received timely alerts and ensured faster procurement processes.
- **Workflow traceability**  
The system serves as a single source of information offering comprehensive visibility into different workflows and get better control over expenses incurred. This improved process transparency and reliability

# Results

Post implementation of our highly effective Power platform enabled procurement system; the client observed various positive results:

- **Eliminate manual work**  
The System acts as a central information repository that contains all critical information pertaining to purchases made, giving leadership team precise visibility into expenditures made, reevaluate, and take better informed decisions.
- **Enhanced transparency**  
Having a centralized repository for all procurement related information ensures increased transparency, leading to better decision making on expenditures and purchases, translating to better budget management.
- **Operational efficiency**  
Microsoft Power based solution reduces overall time spent on purchase related processes, minimizes errors, contributing to overall operational efficiency.
- **Auditable process**  
The system offers a structured and standardized purchase workflow, offering a proper audit procedure to be implemented easily.

# Business benefits

Implementing an efficient Microsoft power platform-based procurement management solution with advanced capabilities brought various business benefits for our client.

## 1. Significant cost savings

Procurement process digitization directly offered cost savings with reduced manual errors and administrative costs, and by enabling bulk purchases.

## 2. Increased efficiency

Streamlined processes ensure better efficiency. Automating purchase order approvals, invoicing processes, with reduced bottlenecks, ensures speedy processing times.

## 3. Better visibility

The system provides real time visibility into procurement activities, spending patterns, etc, making data-driven decision making possible.

# About Aufait Technologies

Aufait is a trusted software product engineering and digital transformation partner that empowers enterprises to transform ideas to commercially successful products and run highly profitable businesses. We help organizations adopt disruptive technologies such as AI and ML, Enterprise 2.0, Mobility and Cloud.

Aufait offers end-to-end enterprise solutions; from concept to design, design to development and implementation, to product launch and continued high-impact digital marketing services to transform your idea to a unicorn, Aufait Technologies is your one-stop destination for all IT solutions.

As a Microsoft Gold Partner with Portals and Collaboration competency and Yammer affiliate, Aufait offers enterprise solutions such as Intranet/Internet Portals, Document Management Solutions (DMS) and Workflow/BPM solutions around SharePoint and Office technologies.
